Professional Profile

Dynamic and versatile professional with over **5 years of dedicated experience in the cryptocurrency and blockchain ecosystem**. Proven track record of supporting Web3 projects from the ground up through a multidisciplinary approach. Expertise spans across technical execution (Blockchain Development, AI Bots, Smart Contracts), brand identity (Graphics Design, Custom Stickers), and community growth (AMA Hosting, Telegram/Discord Management, Content Writing). Adept at driving engagement, building trust, and delivering comprehensive solutions tailored to the fast-paced crypto market.

Key Projects & Collaborations

Throughout my 5-year tenure in the crypto space, I have significantly contributed to the growth, development, and community engagement of the following notable projects:

• Dynex	• IBT
• OpenEX	• Vica Foundation
• Omega Network	• IGSE Coin
• Renewlabs	• LF Coin
• Bull Run AI	• Pizza Text

Service Offerings & Capabilities

Technical Development

End-to-end development of decentralized applications, smart contract deployment, and auditing. Design and integration of robust AI-powered Telegram bots for automating community management, gamification, and user onboarding. Complete website creation tailored for Web3 initiatives.

Community & Content

Proactive community management on Discord and Telegram, fostering healthy and engaging environments for token holders. Expertise in hosting live AMA sessions to bridge the gap between core teams and investors. High-quality content writing spanning crypto news, technical updates, and general marketing copy.

Visual Branding

Crafting distinct visual identities for crypto projects. Creation of promotional graphics, web assets, and engaging custom Telegram stickers/emojis designed to enhance brand recall and community culture.
